I am a **full-stack software engineer**, with **over five years** in the tech industry, including **software development**, **networking**, **cybersecurity**, **IT**, and **tech repair**. My background in both **logistics** and tech has granted me great **analytical** skills as well as those in **optimization** in systems of all kinds. I employ these skills daily to implement **out-of-the-box**, **clean**, and **efficient** solutions to all aspects of software development.

SKILLS:

Languages - C#, Python, JavaScript, HTML, CSS, JSON, Typescript, EJS, DTL

Libraries and Frameworks - React (class-based and hooks), Express.js, Django, JQuery

Database - SQL, PostgreSQL, MongoDB, Mongoose

Other - IT, Automation, Logistics, RESTful Routing, JSON API, Bootstrap, Server Administration, Linux, Virtualization, Networking Hardware & Software, Training & Instructing

PROFESSIONAL EXPERIENCE:

FULL STACK SOFTWARE ENGINEER, CALIBERALPHA | REMOTE

2023 - **PRESENT**

- **Develop** and maintain **responsive** and user-friendly web applications using HTML, CSS, and JavaScript
- Implement modern **frameworks** such as **React** to create **dynamic** and interactive web interfaces
- Utilize server-side technologies such as **Node.js** to handle back-end logic and **database** integration
- Design and optimize **MongoDB** databases to ensure **efficient** data storage and retrieval

INTERN SOFTWARE ENGINEERING MENTOR, CODETHEDREAM | REMOTE

2023 - **PRESENT**

- **Mentor** and provide guidance to a diverse group focusing on immigrants and low-income individuals in a non-profit setting
- Develop and deliver a comprehensive curriculum and lesson plans tailored to the unique needs and backgrounds of students, fostering an inclusive and supportive environment
- Conduct one-on-one and group **coding sessions**, actively assisting learners in fundamental programming concepts and problem-solving techniques
